

Can anything new be written about Jesus Christ these days? Absolutely! Considering the sparsity of information offered in the Gospels or other Church writings, there is a universe of new information awaiting truth seekers. BIN is the first in a six-part controversial series on the life of Jesus Christ, dealing with the meaning and purpose of his ministry, the lineal descent establishing his messianic status, and the great conspiracy surrounding his untimely death. Although fictionalized, it is based on over ten years of research, beginning after Jesus death, when his supposed uncle, Joseph of Arimathaea, and other loyalists are captured on the high seas of the Mediterranean, after trying to escape Roman persecution. The conversation that ensues between Joseph and his captor, Roman naval commander Lansius Maximus Tiberius, becomes the most important conversation about Christ ever, in that it delves into three primary philosophical and religious areas: 1) Gods psyche, reason and purpose for creating mankind in the first place; 2) the unfathomable process and motivation leading up to and surrounding the Human Fall; 3) and the secret formula God implemented in order to guide humanity back to it original position before the Fall occurred. Mysterious and revelatory, this historical expose proves to expand the readers mind beyond comprehension, by simply offering answers to age-old questions, such as, the purpose of life (and death), the root cause of evil, and the formula for a Utopian world, to name a few.
