

Contessa (Choisie Book 1)

Book one of the YA/New Adult Choisie series by the author of *Emi Lost & Found*! When she was four, a generous couple welcomed orphan Olivia Sophia into their lives. As she grew up, her parents made good decisions for her, raising Livvy to be an intelligent and creative young girl. Now sixteen, three people influence many of her choices: her first love, her second father, and a third man who speaks to her through his artwork. Livvy's father is practical and steadfast; even-tempered and quietly observant. She's an artist who acts on her emotions and thrives on attention. Unhappy with their differences and misunderstanding her father's methods, Livvy chooses to focus on the similarities she shares with an enigmatic painter from her mother's past. Her overactive imagination leads her down an obsessive path one that only stands to hurt everyone around her. The distraction of a new boyfriend has the potential to end her search and reunite her family, but his involvement in her life could be just as devastating, taking Livvy away from her father for good. This version now includes the short story, *Jackson*. Mature YA for limited sensual content.
